

Infrastructure

# Hosted. Colocated. Managed.

The lowest-latency Infrastructure-as-a-Service for instant and simplified market access.

TNS sets the precedent of how to build, host and operate the most complex colocated infrastructures that provide fastest market access, for all asset classes, across all geographies. Better yet, we provide this to you as a fully-managed service. Tailored to your trading approach, TNS offers high-availability, high-redundancy and highly-scalable in-colocation hosting options, with seamless integration to its industry-leading ultra-low latency Layer 1 connectivity and market data services.

## The World is Your Data Center

Wherever you require a trading presence, TNS' comprehensive hosting capabilities span the globe. With extensive data center relationships, in-country expertise and powerful connectivity to over 2,800 on-net endpoints, TNS enables instant and cost-effective access to all major financial markets locations.

## Closer Than Close

TNS excels in providing dedicated, state-of-the-art contiguous cabinet environments to minimize in-data center latencies to exchange matching engines. TNS easily scales from single server footprints right up to multi-cabinet, fully-managed environments.

## In Smart Hands

TNS' best-in-class, in-house and regionally located experts specialize in navigating multifaceted implementations. From single U deployments through to multi-rack innovations, TNS delivers market leading colocated infrastructure that is appropriate for your business.

## Security at its Core

TNS understands the importance of safeguarding your mission-critical infrastructure. All rack space that is allocated to you, whether dedicated or shared, is only accessible to pre-authorized parties, and all environments are both physically and logically segregated.

## Every Nanosecond Counts

TNS' pioneering Layer 1 solution offers the lowest-available mutualized connectivity latency to exchanges through its single-hop architecture, facilitating the consumption of market data and routing of mission-critical orders in near real-time. Synchronization to multiple PTP grandmaster clocks also provides highly accurate timestamping within every hosted location.

## Convenience is Key

As an established managed service provider, TNS is a single source for your infrastructure procurement, implementation, monitoring and management needs. TNS' strong balance sheet and amortization options alleviate your budgeting pressures as you scale, while 24x7x365 support and industry knowledge bolsters your existing internal resource.
