

Layer 1: Solving the Equations of Ultra-Low Latency Trading

Purpose-Built Architecture

FPGA-Circuit Technology

Single-Hop Network

5-85ns Latencies

= 10x Faster Connectivity

Deployed in All Major Locations

Standardised Capabilities Everywhere

Fastest Available Telco Interconnections

Fully Managed Service

= Unrivalled Global Coverage

Simple Design & Deployments

Fast-Switch Processing

PERFORMANCE

No Legacy Equipment

Less Internal Management

TCO

= Higher Performance & Lower TCO
