

SIM Management via TNS BI Portal. Where Integrated Reporting and Analytics Come Together.

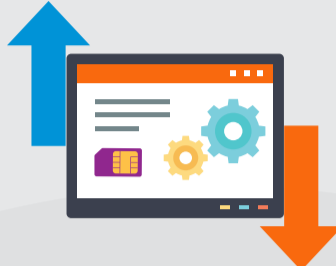

Global SIM Management via the TNS BI Portal delivers a world-class business intelligence tool in a “single pane of glass” for your TNS SIM cards. View and manage TNS SIM cards from mobile operators, whether single network domestic SIM cards or multi-operator roaming SIMs all in one place.

Manage your SIM estate along the entire SIM lifecycle

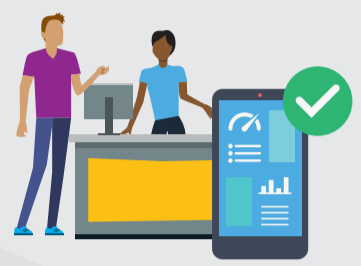

Action

Filter and search by SIM card or device
Activate, pause, reactivate, reset and cancel location

Report

Monthly traffic, usage by SIM (month-to-date and trends)
Inventory
Terminal type

Share

Share dashboard, report or view with another BI Portal user
Provide summarized insights to stakeholders

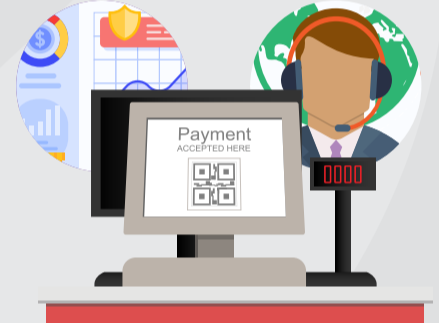

SIM management via TNS BI Portal includes an impressive collection of easy-to-use features and benefits including:

Real-time provisioning, alerting, reporting and analytics.

Sort and filter by carrier, ICCID, detected IMEI, IMSI, custom label, SIM status, device type, usage.

Supported by TNS' 30-year history and focus on the needs of the Payments market.

Manage your SIM cards across dozens of different operators from a single pane of glass

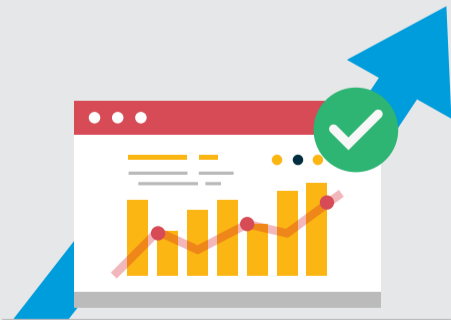

Simplify

Manage tens of thousands of SIMs with single-pane-of-glass visibility.

Save

Reduce your time spent collecting data while lowering costs.

Optimize

More easily capture insights, trends and areas of concern.

Share

Export and share custom reports with external stakeholders.
