

TNSLink

A 'zero-touch' connectivity solution for stand-alone and unattended terminals.

For secure and reliable connectivity solutions that deliver a low total cost of ownership, there's a simple choice: TNSLink.

Delivered worldwide, by one of the most trusted names in the payments industry, TNSLink is a fully managed, PCI compliant connectivity solution for stand-alone and unattended terminals such as ATMs and kiosk.

TNSLink is a resilient, secure and cost-effective solution that meets global connectivity requirements. Since it is hardware and network agnostic, TNSLink connects to virtually any terminal or destination host service regardless of transaction volumes or site requirements.

TNSLink Services Include:

- **Flexible broadband connection services**
- **Wireless connectivity services**
 - Primary and backup wireless options
 - Dual SIM with dual radios options
 - Domestic and roaming SIM options
 - TNS' private secure APN
- **Automated failover and fallback of connection**
- **Redundant hardware configurations available**
- **Vendor management services of carriers providing connectivity solutions**
- **Simplified deployment**
 - 'Zero-touch' configuration
 - Self-service deployment tools
 - Level 1 PCI DSS certification
 - TNS' 24x7x365 active monitoring
- **TNS' vast and worldwide network of connections**
 - Payment's hosts
 - ATM driving / monitoring solutions
 - AWS cloud hosted services
 - Other destination host services

Features

- **Flexible network connectivity** - Supports wired or wireless broadband access methods, including DSL, cable, 3G and 4G/LTE
- **Redundant network connectivity** - Failover options: dual SIM, Wired Broadband to wireless, domestic and roaming SIM availability
- **Access to TNSOnline** - A portal for instant customer troubleshooting, helpdesk support and near-real time reporting
- **Access pooled wireless data plans** - The ability to instantly up/downgrade plans and activate/de-activate SIMs
- **A complete range of end-to-end value add services** - The option for self-installation or on-site professional installation
- **A single point of contact** - Service and support and 24x7x365 monitoring and management by TNS network professionals

Benefits

- **Improve** - Terminal uptime through superior network availability, hardware performance and multiple failover options
- **Reduce** - Lower total cost of ownership (TCO) for all terminals connected to the payments' community
- **Simplify** - Leverage TNS' end-to-end managed services, covering the complete value chain from ordering to operations
- **Secure** - A highly secure, low-latency, end-to-end PCI DSS compliant solution, utilizing TNS' PCI DSS Level 1 certified managed network
- **Flexible** - Maximum flexibility through TNS' commercial structure, instant SIM management and delivery of a 'zero-touch' and telco independent connectivity solution

A Trusted Payment Partner

Offering complete end-to-end solutions, TNS has built its reputation on delivering a suite of quality products and services that are ideally suited to the needs of our customers.

Our almost 30 years of payments expertise, combined with unique network technology, payment gateway services and processing capabilities, has resulted in TNS becoming a preferred payments network provider to processors, financial institutions, ISOs and merchants around the world.

TNS is a proven leader in providing reliable and resilient network and payment gateway services. Businesses large and small trust TNS to keep transaction networks running smoothly and to deliver their transactions to their destination.

TNS' network transports over a billion payments, telecommunications and financial transactions a day. Its secure network is monitored 24x7x365 by three network operating centers in the US, UK and Australia.
