TNS Business Intelligence (BI) Portal. Making Business Intelligence Reporting and Analytics Easier.

The TNS BI Portal is a business intelligence platform that provides enhanced visibility into strategic business data across multiple TNS products, services and regions. Use it with your existing TNS services to analyze your data and make smarter, more informed business decisions.

Three ways the TNS Business Intelligence Portal helps businesses plan ahead
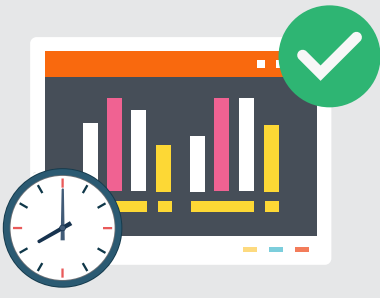

Interact with data to inform decisions.

**Customize** data visualizations to answer questions.

Share discoveries to put data at the center of conversations.

The TNS BI Portal helps you find areas for growth and uncover actionable insights. It's filled with features and benefits including:
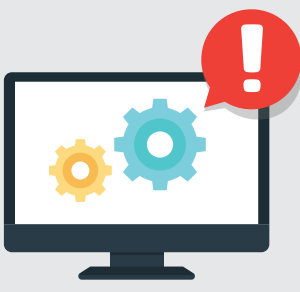

Real-time access to data.

Interactive dashboards and maps.

Self-service automated reports and analytics.
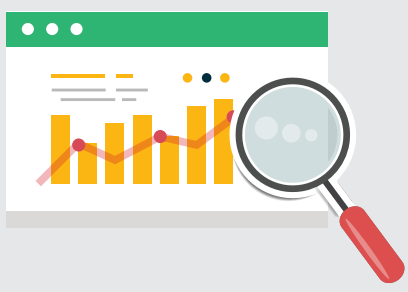

Configurable alerts.

Multi-tenant architecture.

Multi-language support.

Augments and enhances your existing TNS payments services.

## Exceptional benefits in one easy-to-use portal

Forecast
Predict or amend strategies by identifying trends and patterns.

Improve
Capture insights and trends to identify opportunities for growth.
