

TNS Secure SD-WAN. The Benefits of Mission-Critical Payment Capability.

Chain retailing is undergoing a digital transformation driven by evolving consumer demands and expectations. The challenge is made complex by the increased number of devices, safety concerns and strained systems. Fortunately, TNS is expanding its PCI compliant managed services in partnership with Fortinet to deliver highly-secure SD-WAN services designed specifically for retailers, financial institutions and merchant acquirers.

30+
Years

TNS has provided our clients with unsurpassed reliability, security and network resiliency since 1990.

TNS Secure SD-WAN helps you modernize, reduce costs, improve security, increase reliability and much more.

Modernize the in-store customer experience

Add new digital marketing initiatives and in-store interactions.

Expand in-store services such as omnichannel, mobile POS and Wi-Fi.

Increase capacity and reliability, and reduce speed of deployments.

Broaden payment acceptance.

Provide better customer service with "zero touch" routers.

Lower costs and improve network reliability

Reduce OpEx up to 40% by reducing data, hardware, support and security.

Optimize traffic across multiple in-store devices.

Connect with 99.99% uptime and persistent monitoring utilizing our three NOCs in the US, UK and Australia.

Drive new revenue streams while increasing customer loyalty.

Simplify branch IT management.

Provide secure cloud access

Deploy new apps quickly with secure internet connectivity.

Protect your organization with secure, direct access to the public cloud and SaaS apps.

Mitigate risk from hacking or ransomware with anti-virus, anti-malware and anti-spying protection.

Rest easier with level 1 PCI DSS compliant service for highly secure two-way cloud connectivity.

Increase capacity or failover with broadband, LTE or 5G SIMs.

Improve network reliability and flexibility

Diversify outage risks with access to multiple carriers.

Scale network capacity.

Avoid dormant SIMs with SIM activation/de-activation.

Upgrade or downgrade data plans with no additional fees.

Improve uptime with geographic redundancy and high-availability SLAs.

The best payment solutions provider has partnered with the best SD-WAN hardware manufacturer.

Provides secure payment solutions to companies large and small. Our end-to-end payment solutions transport more than a billion payments a day to more than 60 countries around the world.

Is the fastest-growing SD-WAN provider in market share and revenue, and has been named a Leader in the 2020 Gartner Magic Quadrant for WAN Edge Infrastructure.

With TNS Secure SD-WAN retailers can simplify, secure and improve their branch network and transform their digital experience.
