

Connectivity

One Network Endless Possibilities

Reach a global community of industry counterparts through a single link, and leverage purpose-built high bandwidth, low latency data and exchange connectivity.

TNS understands that to succeed in today's demanding trading landscape, dependable and high-performance connectivity is critical. That's why TNS empowers financial markets participants to easily and immediately access anyone, anywhere, from a single managed connection to our global network. Coupled with the ability to deliver dedicated, high-bandwidth connectivity, TNS enables you to consume and interact with counterparty services, exchanges and market data sources, while alleviating the burden of spiralling connection charges, protracted setup processes and performance-impacting latencies.

**5,000
Global Endpoints**

**Single-Link
Access**

**750+
Counterparties**

**140+
Exchanges**

**130 POPs Across
the Americas, Europe
and Asia-Pacific**

**Latency-Optimized
Network**

Access Everyone

From banks, market makers and exchanges, to application service providers and software vendors, TNS has cultured a single, secure and flexible trading community network of over 2,800 global endpoints.

Access Everywhere

With over 130 POPs globally spanning the Americas, Europe and Asia-Pacific, and its own highly-skilled, in-region industry support and expertise that is available around the clock, TNS helps its clients become efficiently provisioned and operational within a matter of days.

Access with Confidence

Offering exceptionally high uptime, TNS' network has been architected with high levels of reliability in mind. Each endpoint features multiple, diversely routed connections, from different telco providers, to deliver unparalleled robustness¹.

Access Quickly

TNS leverages the lowest commercially available latencies between data centers and use the latest-generation Layer 1 switches when interfacing with many exchanges, delivering ultra-low latency² connectivity without compromise.

Access Markets

Enhanced with high-speed fibre in all key trading centers, TNS' global backbone has been specifically engineered to deliver dedicated bandwidth to comfortably support escalating market data and transaction volumes, while continuing to provide industry leading latencies.

Access the Cloud

TNS supports secure connectivity to private, public and hybrid clouds and client infrastructure configurations. TNS offers tailored implementation and end-to-end management for guaranteed business continuity.
