

## Attended Payments

# Payment terminals for retail and fuel industries

TNS offers a comprehensive suite of reliable and secure attended payment solutions. Our portfolio of payment terminals caters to both retail and petroleum industries.

## Accept any payment with our secure terminal solution

Our countertop payment terminals accept all payment methods, including major debit and credit card schemes, fuel and loyalty cards, mobile wallets, QR codes and alternative payment options. This extensive card processing capability empowers merchants to provide accessible payment methods for all their customers while optimizing operational efficiency, and upholding compliance and security standards.

## How does it work?

We provide the latest feature-rich in-store terminals, including the newest Android range. We work directly with partners to develop the right terminal and integration approach for your needs. The Android range of terminals enables flexibility, supporting custom applications that can be developed and integration with third-party hosts and platforms for loyalty programs and fleet card solutions can be supported.

In addition to providing terminals and integration with your operating systems, we offer smooth transaction processing through our secure payment gateway. This gateway provides access to leading acquirers and seamless integrations with processors, PSPs, and various other intermediaries.

## Featured hardware

We offer the latest terminal range, or you can bring your own. Here are our most popular.

### PAX A80

Enables full connectivity for reliable payment processing, even during the busiest hours.

### PAX A920 Pro

Supports a wide range of advanced connectivity options to enable fast processing of payments. Includes a large HD screen, a professional infrared barcode scanner and a 5MP camera.

### Ingenico Move 5000

Enables acceptance of all payment methods within a 30ft range from the base unit, featuring multimedia capabilities and a large 3.5-inch color touchscreen.

**The components and features of TNS' Attended Payments solution**

**Premium terminals and certified acquirers**

Select from the latest range of certified terminals and devices for always-secure payments.

**Accept your customers' favorite payment methods**

Securely accept any type of payment: Visa, Mastercard, Diners, eftpos, UPI, QR codes and mobile wallets (such as GooglePay and ApplePay).

**Loyalty card and fleet card processing**

Supports multiple card processing formats including existing loyalty and fleet card solutions or add new capabilities for customers.

**Merchant Centre Portal and reporting**

Our portal enables you to access real-time transaction logs, manage refunds, invoicing and reports

**24/7/365 support**

We offer an always-on help desk to support you when you need it.

**Keys on terminals**

We manage the acquirer encryption keys, so you can change acquirers without re-keying all terminals.

**Fast payment processing and smart routing**

We provide smart routing and seamless transaction processing through our secure payment gateway.

Attended Payments takes care of your payment terminals – so you can focus on your business.

**Improved customer experience**

Simplify the buying journey with multi-channel payment acceptance via cards and mobile wallets, enabling customers to upsell themselves without cash concerns.

**Bespoke solution for your business needs**

We identify the specific requirements of each location and design the best solution.

**Enhanced security and compliance**

TNS offers a P2PE validated solution that improves overall transaction security and can help minimize your PCI scope.

**Loyalty program integration**

Provide value-added benefits to your loyalty members, fostering customer retention and engagement.
