

Outdoor payment

Outdoor payment terminals for fuel retailers

TNS offers a comprehensive suite of reliable and secure outdoor payment solutions ideal for the petroleum and convenience industry.

Accept any payment with our secure terminal solution

Our outdoor payment terminals securely accept all payment methods, including major debit and credit card schemes, fuel and loyalty cards, mobile wallets, QR codes and alternative payment options.

TNS' payment terminals can be integrated to fuel dispensers as an outdoor payment terminal with custom retrofit design, manufactured and supplied by TNS.

How does it work?

We provide the latest feature-rich outdoor terminals, including the newest Android range. We work directly with partners to develop the right terminal and integration approach for your needs.

The Android range of terminals enables flexibility, supporting custom applications that can be developed and integration with third-party hosts and platforms for loyalty programs and fleet card solutions. We can also support a custom integration to your fuel system, petrol pump or any other equipment.

In addition to providing terminals and integrations with your operating systems, we provide seamless transaction processing through our secure payment gateway, providing access to leading acquirers and integrations with processors, PSPs and everyone else in-between.

The components and features of TNS' Outdoor Payments solution

Premium terminals and certified acquirers

Select from the latest range of certified terminals and devices for always-secure payments.

Accept your customers' favorite payment methods

Securely accept any type of payment: Visa, Mastercard, Diners, eftpos, UPI, QR codes and mobile wallets (such as GooglePay and ApplePay).

Loyalty card and fleet card processing

Supports multiple card processing formats including existing loyalty and fleet card solutions or add new capabilities for customers.

Merchant Centre Portal and reporting

Our portal enables you to access real-time transaction logs, manage refunds, invoicing and reports.

24/7/365 support

We offer an always-on help desk to support you when you need it.

Keys on terminals

We manage the acquirer encryption keys, so you can change acquirers without re-keying all terminals.

Fast payment processing and smart routing

We provide smart routing and seamless transaction processing through our secure payment gateway.

Remote configuration and updates

Enable remote configuration and software updates on terminals.

Outdoor Payments takes care of your payment terminals – so you can focus on your business.

Improved customer experience

Simplify the buying journey with multi-channel payment acceptance via cards and mobile wallets, enabling customers to upsell themselves without cash concerns.

Enhanced security and compliance

TNS offers a P2PE validated solution that improves overall transaction security and can help minimize your PCI scope.

Bespoke solution for your business needs.

We identify the specific requirements of each location and design the best solution to integrate into your fuel system, petrol pump or any other equipment.

Loyalty program integration

Provide value-added benefits to your loyalty members, fostering customer retention and engagement.

Multimedia advertising

Enrich your customer experience and gain third-party advertising opportunities by displaying video, images, and custom web pages to your customers. An ideal opportunity for additional revenue generation, as well as insightful reports on customer interaction.

Premium durability

Our robust terminals offer premium quality, ensuring longevity and resilience in harsh environments.
