UnattendedPayments Solution

Enabling secure cashless transactions for unattended self-service terminals

TNS UnattendedPayments offers a range of reliable and secure self-service readers and payment processing devices. Our unattended terminals feature easy integration and simple deployment, built for every self-service business environment.

A solution with features and flexibility, built-in

TNS Unattended terminals help you accept, no matter how your customer wants to pay. Leading parking, vending, ticketing, petroleum and self-service merchants rely on TNS to enhance operational efficiency and increase revenue.

Integrate into any acquirer, device or partner – with a unified API. This includes integration with third-party hosts and platforms for loyalty programs and/or bespoke software integrations and certifications. TNS Unattended supports the latest terminal range or enables you to bring your own device.

We work directly with partners or merchants to help develop the right unattended terminal solution and integration approach to meet their needs.

How does it work?

TNS' terminals, certified by leading acquirers and processors, can be installed in a wide range of unattended payment environments by integrating into various systems which is fast and easy using our SDK and API library. We ensure seamless terminal integration and accept all major payment methods and wallet schemes.

In addition to providing terminals and integrations with your operating systems, we provide seamless transaction processing through our secure payment gateway, providing access to leading acquirers and integrations with processors, PSPs and everyone in between.

The components and features of TNS UnattendedPayments Solution

Premium terminals and certified acquirers

Select from the latest range of certified terminals and devices for always-secure payments.

Accept your customers' favorite payment methods

Securely accept any type of payment: Visa, Mastercard, Diners, eftpos and mobile wallets (such as GooglePay and ApplePay), as well as new or existing loyalty solutions.

Merchant Centre Portal and reporting

Our portal enables you to access real-time transaction logs, and manage refunds, invoicing and reports.

24/7/365 support

We offer an always-on help desk to support you when you need it.

Simple deployment and bespoke integrations

TNS ensures every deployment is fast and smooth and the integration of the terminal is seamless for you with our existing SDKs and API library.

Keys on terminals

We manage the acquirer encryption keys, so you can change acquirers without re-keying all terminals.

Fast payment processing and smart routing

We provide smart routing and seamless transaction processing through our secure payment gateway.

TNS Unattended helps you accept payments easily with industry-leading terminals – so you can focus on your business.

Improved customer experience

Simplify the buying journey with multi-channel payment acceptance via cards and mobile wallets, enabling customers to upsell themselves without cash concerns.

Premium durability

Ensure longevity and resilience in harsh environments with our robust, premium-quality terminals.

Enhanced security

Offer secure payments and reduce and minimize PCI scope with a fully integrated PCI DSS-certified solution, EMV-certified terminals and a P2PE-validated solution.

Bespoke solution

Find a solution that works for you and your business. We identify the specific requirements of each location and design the best solution, supporting integrations to your parking system, point of sale, vending machine or any other payment equipment.
