

SOLUTION SHEET

# Fuel your Business with an All-in-One Solution

Forget the complexity of multiple vendors. **TNS' Complete Commerce** is a full-stack payment and network connectivity solution.

## A Managed Service for Fuel and Convenience Retailers

Through TNS' Complete Commerce solution, enterprises can accept any transaction with our terminals and online, connect point-of-sale terminals and fuel retail stores with our managed network service solutions, and orchestrate payment transactions via our cloud-native platform. You can be confident that the entire payment process is protected, wherever it starts and wherever you need it routed.

It's an all-in-one solution that's designed for your unique forecourt environment – and deploys quickly and integrates seamlessly.

### Indoor payment terminals

Help your customers get what they need, quickly – using virtually any payment method. Use our fuel-tailored terminals or bring your own for a seamless payment solution.

### Outdoor payment terminals

Integrate durable pre-certified payment terminals into fuel dispensers for a custom retrofit design. And multimedia advertising makes the most of your forecourt real-estate.

### Payment orchestration

Securely accept a wide range of payment methods, and process them through our payment orchestration platform. Get global access to leading acquirers and integrations with payment providers.

### Network connectivity

Keep your business connected with our PCI DSS-certified, managed connectivity solution that ensures payment terminals, forecourt systems and POS equipment stay online.

## Accept Any Payment

Your customer should be able to pay in the way that's easiest for them. That's why TNS payment terminals securely accept most payment methods – from traditional card schemes to alternative payment methods.

### Benefits

#### Easy management with a next-generation terminal solution

TNS manages the payment terminal (including acquirer encryption keys) and connectivity services for you. Android-based, affordable, zero-touch terminals make it simpler and faster to provide terminal updates and refreshes.

#### Increased revenue from multimedia advertising

Make the most of your forecourt real-estate. TNS terminals include multimedia advertising to help drive revenue and improve customer experience.

#### Reduced complexity

Simplify your payments ecosystem by consolidating multiple vendors and reducing your hardware footprint. A single acquirer and telco-agnostic partner removes admin burden and reduces your total cost of ownership.

### Features

#### Enhanced security

Help your business secure sensitive data and maintain compliance with the latest security standards across payments and network connectivity, including: PCI DSS, PCI P2PE, PCI PIN certifications and use of PCI PTS v6.x devices.

#### 100% acquirer agnostic and smart routing

Bring your own acquirer or use multiple acquirers – for cost optimization, convenience, and no disruption to your business or your customers. Smart routing enables you to send transactions to the acquirer of your choice, based on BIN, card type and amount.

#### Unified insights and reporting

Improve visibility with the TNS Merchant portal provides a unified view and real-time reporting for deep business insights. And with the TNSOnline monitoring portal – you can get alerts, diagnostics and track the status of every device, network and POS transaction to quickly troubleshoot issues.

#### Managed connectivity for your device, forecourt and C-store

TNS solutions reduce complexity across your entire fuel and convenience business. From protecting your POS terminals against outages to facilitating mission-critical payments, we have the solution that's right for your fuel business.

### Complete Commerce You Can Trust

More than 1,400 customers across 50 countries rely on TNS and its Complete Commerce infrastructure-as-a-service platform. With over 30 years of experience, fuel and convenience retailers rely on TNS' innovative, value-added services.
