

PRODUCT SHEET

TNS GPRS Roaming Exchange

Single connection service provides worldwide GPRS data roaming

Reach all your GPRS roaming partners and provide complete coverage to roaming subscribers. Conveniently connect to our global network and maximize roaming revenues with minimal investment.

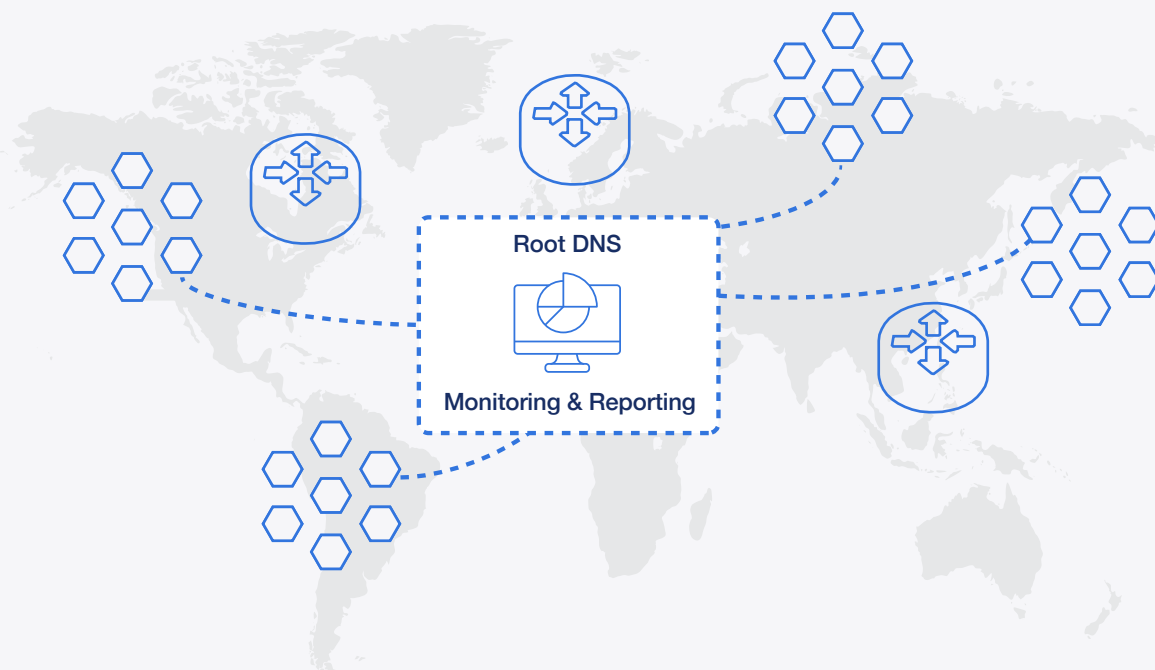

High Quality Connectivity

TNS GPRS Roaming Exchange (GRX) Service offers high quality connectivity to GPRS, 3G, HSPA and LTE wireless networks over a state-of-the-art carrier-grade MPLS backbone with complete isolation from the public internet. Through multiple private and public peering locations in North America, Europe and Asia, TNS can deliver optimal routing between roaming partner networks.

Leverage the TNS one-to-many market advantage through a variety of flexible connectivity options to meet most connectivity preferences and multiple choices for network design including network transport type, topology, speeds, load balancing, and redundancy.

TNS GRX Network

Features

Global points of presence and peering - Connect to all other GRX networks with redundant access to multiple PoPs

Low latency - TNS connects directly to your site, network issues are identified and resolved without delay

Flexible connectivity - Connect to GPRS roaming partners via our private IP or through VPN connectivity as a primary, back-up, or redundant connection

Class of service - Ensure priority and prompt delivery utilizing MPLS traffic prioritization to select which applications will be handled in-traffic

Advanced online reporting - Critical data roaming information, such as network availability and service level metrics are available in near real-time

Benefits

Minimize latency - Geographically located peering points eliminate the cost and delay of backhauling traffic to other regions

Optimize revenue - Grow revenue through high-quality mobile experiences for subscribers

Improved end-user experience - Enable a subscriber to access its home services from any of its home PLMN's roaming partners

Reduce costs - Make the network cost-efficient end-to-end with flexible connectivity options to minimize data transport costs

Proactive network planning - Online reporting of historical usage data enables proactive network planning and support

Premiere help desk support - World-class 24/7 support is included
