

Transform Your Business With Managed SD-WAN

In today's digital world, everything's moving fast, and your business needs to keep up. Software-Defined Wide Area Network (SD-WAN) solutions can help address key market challenges:

Slow traditional WAN provisioning

Rising branch network costs

Complex connectivity for cloud access

Security concerns and scalability issues

Why SD-WAN Can Help Your Business

SD-WAN is a virtual network architecture that securely connect users to applications. Through TNS' managed network service capabilities, SD-WAN technology can help create an efficient, resilient and scalable environment for your business.

Connects applications, such as POS terminals, branches, guest Wi-Fi, CCTV, IoT, and internet.

Preserves performance and prioritizes flows based on business-critical services.

Eliminates all hassles and efforts for you to build, deploy and run the solution.

• Improve Performance

TNSLink SD-WAN ensures the best performance for network resources and critical applications while keeping costs low.

Customer Experience

Improved application performance and visibility lead to enhanced customer satisfaction.

Streamlined Operations

Simplify operations with a single contract and supplier. Quickly onboard new stores and business applications with ease.

Tailored Solutions

Customized solutions to meet specific requirements of each retail location. Modify business policies flexibly to adapt to business transformation.

Reliability and Flexibility

Predictable performance for business-critical applications, whether on premises or in the cloud.

Grow Your Business to New Markets

Expand to remote locations with a reliable connectivity and consistent experience.

• TNS Offers Connectivity You Can Trust

TNS provides end-to-end managed connectivity and network security solutions, offering a reliable and scalable vendor-agnostic platform. With our comprehensive managed service solution, we deliver, maintain and support all transaction network components – including connectivity services, routers and software licenses.

With our extensive experience in delivering and managing connectivity services for payment and mission-critical needs, TNS is well-positioned to meet and exceed your expectations.
