Payments and Connectivity

Fuel your business with an all-in-one solution

Forget the complexity of multiple vendors. TNS' **Complete Commerce** is a full-stack payment and network connectivity solution.

A managed service for fuel and convenience retailers

Through TNS' Complete Commerce solution, enterprises can accept any transaction with our terminals and online, connect point-of-sale terminals and fuel retail stores with our managed network service solutions, and orchestrate payment transactions via our cloud-native platform. You can be confident that the entire payment process is protected, wherever it starts and wherever you need it routed.

It's an all-in-one solution that's designed for your unique forecourt environment – and deploys quickly and integrates seamlessly.

Accept any payment

Your customer should be able to pay in the way that's easiest for them. That's why TNS payment terminals securely accept most payment methods – from traditional card schemes to alternative payment methods and fuel cards.

+ more

Indoor payment terminals: Help your customers get what they need, quickly – using virtually any payment method. Use our fuel-tailored terminals or bring your own for a seamless payment solution.

Outdoor payment terminals: Integrate durable pre-certified payment terminals into fuel dispensers for a custom retrofit design. And multimedia advertising makes the most of your forecourt real-estate.

Network connectivity: Automatically connect your payment terminals to the best-performing carrier using our multi-carrier smart SIM. Count on our managed router solution for store and forecourt networking and connectivity with private and guest Wi-Fi, LAN switches and SD-WAN with 24/7 monitoring.

Payment orchestration: Securely accept a wide range of payment methods, and process them through our payment orchestration platform via a single API integration. Get global access to leading acquirers and integrations with payment providers.

Benefits

Easy payment processing

Our next-generation terminal solution manages your payment terminal (including acquirer encryption keys) and connectivity services for you. Android-based, affordable, zero-touch terminals make terminal updates and refreshes simpler and faster.

Reduced complexity

Simplify your payments ecosystem and reduce your total cost of ownership. A single acquirer and telco-agnostic partner consolidates multiple vendors and reduces your hardware footprint.

Increased revenue from multimedia advertising

Make the most of your forecourt real-estate. TNS terminals include multimedia advertising to help drive revenue and improve customer experience.

Managed security

Help your business secure sensitive data and maintain compliance with the latest security standards across payments and network connectivity, including: PCI DSS, PCI P2PE, PCI PIN certifications.

100% acquirer agnostic and smart routing

Minimize transaction costs, increase conversions and improve resilience against outages with multi-acquirer, smart and least-cost routing strategies. And simplify selecting an acquiring partner by leveraging our existing relationships with leading acquirers.
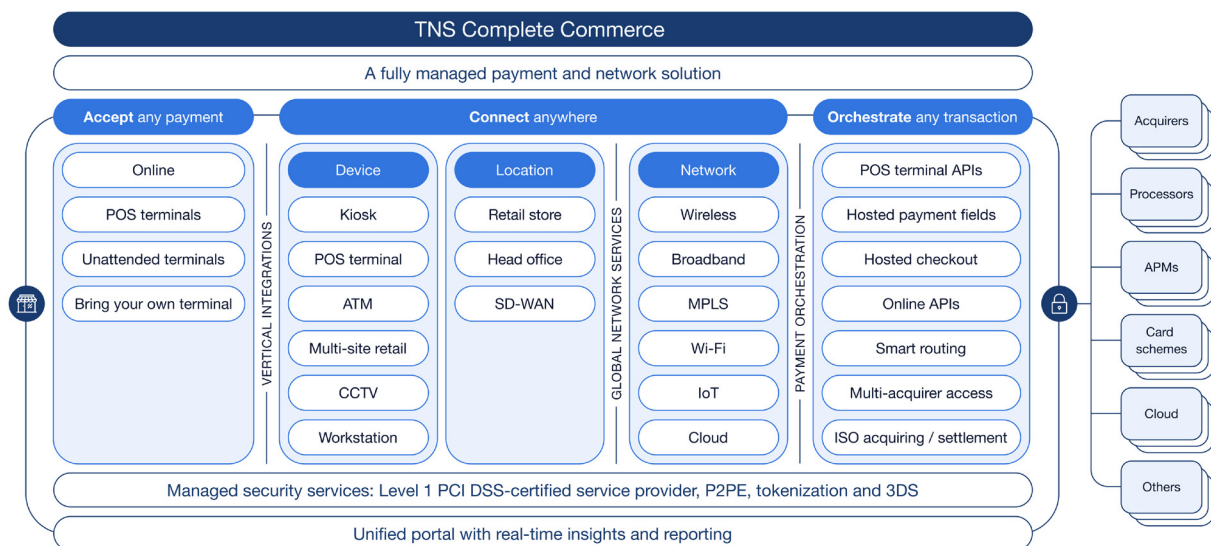

Unified insights and reporting

Improve visibility with the TNSPay Merchant Portal, providing a unified view and real-time reporting for deep business insights. And with the TNSOnline monitoring portal, you can get alerts, diagnostics and track the status of every device, network and POS transaction to quickly troubleshoot issues.

White glove service

Get help whenever you need it. Remote software updates, expert account managers and round-the-clock, global 24/7 Network Operating Centers mean your payments team can focus on your business operations.

TNS Complete Commerce
