

Parking Management Solutions and Payment Terminals

Drive revenue with a simplified parking solution

Optimize revenue and improve customer satisfaction with TNS' Complete Commerce. Our unified and easy-to-operate system lets you enable membership and session parking, accept online reservations and receive cashless payments at unattended terminals.

Designed to eliminate the complexity of multiple vendors, Complete Commerce is a full-stack payment and network connectivity solution for parking businesses. You can accept any transaction at terminals or online, connect POS terminals, stores and parking sites with managed network services, and orchestrate payments through our cloud-native platform

Experience smooth deployment and terminal integration by leveraging our **15+ existing integrations** with leading PARCS partners, or use our API library.

parking sites

Accept any payment

Your customer should be able to pay in the way that's easiest for them. That's why TNS' parking solutions and payment terminals securely accept most payment methods – from traditional card schemes to alternative payment methods.

The managed payment service for parking

Unattended payment terminals: Choose from a range of pre-certified, plug-and-play payment terminals that easily install on your parking equipment, parking meter or control system. Or, bring your device with you and keep your existing banking arrangement. Includes cables, brackets and multi-price configuration.

Pre-booking, membership, session parking:

Our online parking solutions enable your customers to plan ahead, book and pay in advance, subscribe for seamless entry and exit, and start and stop session parking. We provide an all-in-one app and processing system that keeps things smooth and simple.

Terminal and site network connectivity:

Automatically connect your POS terminals to the best-performing carrier using our multi-carrier smart SIM. You can count on our managed router solution for store networking and connectivity with private and guest Wi-Fi, LAN switches and SD-WAN with 24/7 monitoring.

Payment orchestration: Securely accept a wide range of payment methods, and process them through our payment orchestration platform via a single API integration. Get global access to leading acquirers, PSPs and processors.

Benefits

A global trusted partner

With deep knowledge of the parking industry supporting 4.2m+ parking bookings per year and 5m+ active parking platform users around the world, our teams help you select the right partners and payment solutions to streamline your business operations.

Easy management

TNS manages your payment terminal (including acquirer encryption keys) and connectivity services for you. Pre-certified, affordable, zero-touch terminals make it simpler and faster to provide terminal updates and refreshes.

Simple parking equipment integration

Experience smooth deployment and terminal integration by leveraging 15+ existing integrations with leading PARCS partners or use our API library. So integration with leading manufacturers and pre-certified terminals is easy and hassle-free.

Managed security

Help reduce your regulatory burden and fraud risk with the latest security standards across payments and network connectivity, including: PCI DSS, PCI P2PE, PCI PIN certifications. Tokenization services, too.

White glove service

Get help whenever you need it. Remote software updates, expert account managers and round-the-clock, global 24/7 Network Operating Centers mean your payments team can focus on your business operations.

Reduced complexity

Simplify your payment ecosystem by consolidating multiple vendors and reducing your hardware footprint. A single acquirer and telco-agnostic partner removes admin burden and reduces your total cost of ownership.

Increased revenue

Increase conversions, minimize transaction costs, and improve resilience against outages with multi-acquirer, smart and least-cost routing strategies that direct your transaction the optimal way for your business. Plus, maximize conversion by accepting any payment method your customer wants to use.

100% acquirer agnostic and smart routing

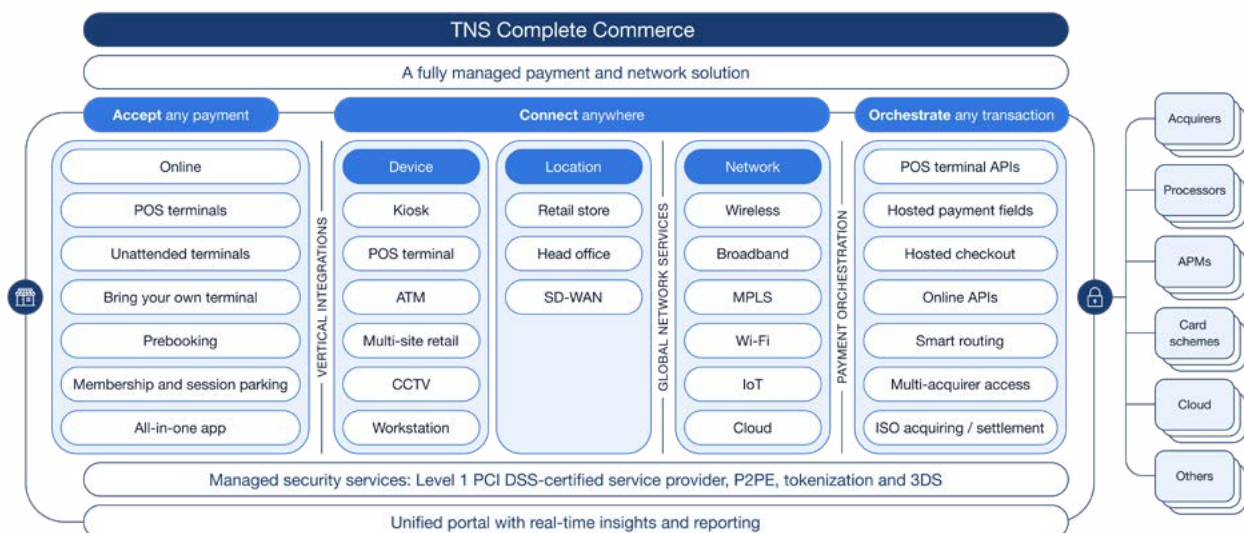

TNS has extensive acquirer certifications globally. Bring your own acquirer or use multiple acquirers with no disruption to your business or customers. Plus, multi-acquirer, smart and least-cost routing direct your transaction the optimal way for your business.

Unified insights and reporting

Improve visibility with TNSPay Merchant Portal, where you can gain insights into your business transactions and manage your payments and services from a single dashboard. And with the TNSOnline monitoring portal, you can get alerts, diagnostics and track the status of every device, network and POS transaction to quickly troubleshoot issues.

ISO acquiring (optional)

To simplify your acquiring partner selection, we also have relationships with leading acquirers that we can recommend and guide you through the merchant service fees and card processing decision process.
