General Manager, Financial Markets

## TNS Connects to Tokyo Financial Exchange

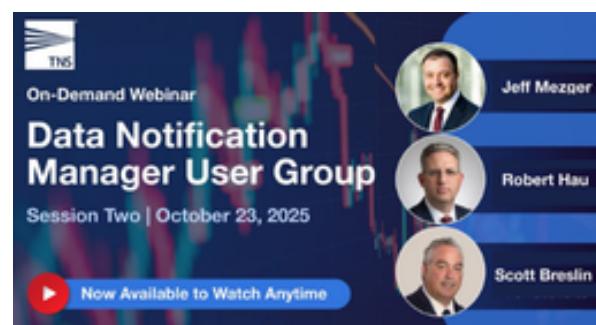

TNS has announced the expansion of its global market data infrastructure in the Asia-Pacific region through newly established connectivity to Tokyo Financial Exchange (TFX), one of Japan's leading derivatives exchanges. With the addition of TFX, TNS' connectivity now extends across all major Japanese exchanges, providing firms a single provider for comprehensive, managed access to Japan. This exciting milestone further demonstrates TNS' continued investment in the APAC region.

## Fireside Chat Episode 3

TNS' Jeff Mezger and Robert Hau join Barry Freeman of BBAE to discuss why BBAE partnered with TNS, the challenges and trends for public cloud

## DNM User Group Session 2

In the [second session](#) of TNS' bi-annual Data Notification Manager (DNM) User Group webinar series, the TNS

and raw multicast market data, the growth in 24x5 overnight trading and more in the [third episode](#) of TNS' Fireside Chat series.

team shared the latest product enhancements and roadmap along with an exclusive demonstration of TNS Data Usage Optimizer (DUO).

## 24X National Exchange Partners with TNS

Through a strategic partnership with 24 Exchange, TNS now provides access to market data, via its secure, low latency infrastructure, from 24X National Exchange. This is the first national securities exchange approved by the SEC to offer 23-hour weekday trading of US equities. With their members and retail trading clients now able to receive real-time pricing information and trading updates with optimal performance, this collaboration further establishes 24X at the forefront of market transformation. Additionally, this connection enhances TNS' 24x5 trading capabilities, specifically for firms in the APAC region.

## Why Partnering with a Managed Service Provider Makes Strategic and Financial Sense

Maintaining and managing an efficient trading infrastructure can be challenging and costly, especially when firms attempt to manage operations in-house. These challenges highlight why outsourcing to a Managed Services Provider (MSP) is a cost effective, scalable and strategic decision. Read the full [blog post](#) to learn more about how to evaluate and find the right MSP and the importance of a vendor neutral MSP.

## How the Overnight Trading Boom is Reshaping Global Markets

As global markets evolve, technology advances, and interest in overnight trading surges, it is important that firms reevaluate how they access financial markets. In this [blog post](#), discover why the standard 9-to-5 trading day may soon become obsolete as demand for 24x5 trading grows, particularly in the APAC region. Firms looking to succeed as the trading environment evolves must recognize this shift and take steps to leverage advanced infrastructure and strategic partnerships.

## What to Consider When Implementing an Overnight Trading Strategy

## Follow Our LinkedIn Showcase Page

TNS' Jeff Mezger discusses the importance of overnight trading and shares industry best practices to help firms position themselves for success in this [article](#) from Finance Derivative.
