TNS: Protect Your Patients, Restore Trust and Transform the Healthcare Voice Channel

Introducing the TNS Enterprise Product Suite

A selection of award-winning call authentication, spoof protection and branded calling technologies is now available from TNS and offers a range of flexible deployments to suit our channel partner customers. Learn how TNS can deliver real value by helping businesses save time and money through increased call answer rates and more efficient engagement, while protecting customers and their brand.

Fully integrated, TNS' solutions are available without an app download on over 300 million Android and iOS devices across the Verizon Wireless, T-Mobile, AT&T Wireless and USCellular networks. This makes it easy, fast and efficient for channel partners to add our solutions to their existing offerings.

HEALTH SCORE

Monitor It

TNS Telephone Number Reputation Monitoring (TNRM)

- See your telephone number reputation in real time.
- Get alerts when your score drops or spam flags appear.
- Fix issues before they impact patient engagement.
