

RADIANZ

The world's largest financial extranet.
Connect once. Exactly where you need to be.

Fast, reliable access to the global trading ecosystem through a single managed connection – simplifying how firms connect to venues, counterparties, market data providers and applications worldwide.

Global trading environments are increasingly interconnected and constantly expanding. Firms must maintain reliable connectivity across markets while managing growing numbers of venues, counterparties, partners and platforms. Radianz removes that challenge.

As the industry's leading financial extranet, it replaces fragmented multi-destination trading connectivity with a single, high-performance network. Institutions connect once for fast access to the global trading community, significantly simplifying trading connectivity.

Originally launched as the industry's first extranet, Radianz underpins the most extensive network of trading endpoints in global financial markets.

What Radianz delivers.

For firms that need the agility to move quickly as trading strategies evolve and opportunities emerge.

Unrivalled reach

Access any endpoint globally through the industry's largest financial trading community.

Expand faster

Rapidly onboard new venues, partners and services as trading requirements evolve.

Built for performance

Proven reliability, security and resilience for mission-critical trading applications and data distribution.

Simplify connectivity

Streamline multiple vendor relationships into a single managed network via one partner.

Access more services

Tap into thousands of applications, platforms and services already available on the network.

Free your network teams

Connectivity infrastructure fully operated, monitored and supported by Waypoint specialists.

Exactly where you need to be.
Navigating complexity with transparency.
