

Payments and Connectivity

Simplify your unattended business with an all-in-one solution

Forget the complexity of multiple vendors. TNS's **Complete Commerce** is a single solution for your payments and connectivity needs.

Create a complete experience across your self-service terminals, reservation platform and online customer interactions with our 100% terminal, acquirer, partner and network-agnostic approach.

Parking
payments

Vending and
kiosk payments

Laundromat
payments

Transport and
ticketing payments

Accept any payment

Your customer should be able to pay in the way that's easiest for them. That's why TNS payment terminals securely accept most payment methods – from traditional card schemes to alternative payment methods.

+ more

A managed service for unattended payments

Complete Commerce securely connects payment terminals, in-store networks and your self-service cloud environments, seamlessly. TNS manages the terminal hardware, equipment integrations and connectivity services for you.

Unattended terminals: Choose from our range of terminals or bring your own. Easy integration and simple deployment eliminates the need to build, add and maintain complex connections.

Reliable connectivity: Connect any unattended payment terminal, site or cloud environment with our fully managed service – ensuring your transactions are fast and secure.

Payment orchestration: Our secure payment platform enables seamless transaction processing, routing any transaction type to any endpoint – globally.

Unified insights: Manage your payments, real-time reporting and insights in a single dashboard. So you can make more informed decisions.

Benefits

Easy payment processing

Our cloud-native payment platform brings together unattended, in-store and online payment solutions, acquirer integrations, APIs, value-added services and portals through a single platform.

White glove service

Get help whenever you need it. Remote software updates, expert account managers and round-the-clock, global 24/7 Network Operating Centers mean your payments team can focus on your business operations.

Modular solution

Get a bespoke solution designed for your specific location, supporting integrations to your parking system, point of sale, vending machine or any other payment equipment.

Managed security

Help your business secure sensitive data and maintain compliance with the latest security standards across payments and network connectivity, including: PCI DSS, PCI P2PE, PCI PIN certifications.

100% acquirer agnostic and smart routing

Minimize transaction costs, increase conversions and improve resilience against outages with multi-acquirer, smart and least-cost routing strategies. And simplify selecting an acquiring partner by leveraging our existing relationships with leading acquirers.

Fully managed connectivity

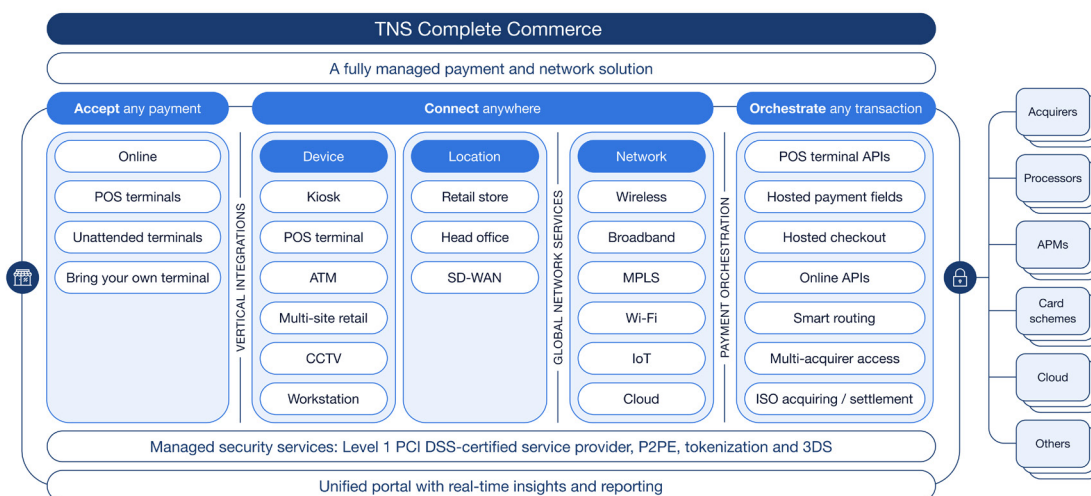

From protecting your terminals against outages to facilitating mission-critical payments, TNS helps reduce complexity across your entire business.

Simple terminal equipment integration

Experience smooth deployment and terminal integration by leveraging our existing integrations with leading partners or use our API library. So integration with leading manufacturers and pre-certified terminals is easy and hassle-free.

Acquirer certifications: Process your payments with the highest level of reliability and compliance with TNS terminals – certified with leading acquirers around the world.
