Waypoint Trading Solutions Launches Archon to Simplify Market Data Entitlement Management

Last week, Waypoint issued a press release to announce the launch of Waypoint Archon, an enterprise-grade market data entitlement management system designed to help financial institutions control costs and reduce compliance risk across their trading environments. As the latest addition to Waypoint's broader [suite of data usage optimization products](#), Archon

centralizes user permissions, automates exchange reporting and enables single sign-on across multi-vendor trading terminals.

The Hidden Operations Layer of Modern Trading

Market data may not always be the most visible part of trading, but it plays a critical role in how firms operate. In this [article](#) for TabbFORUM, Waypoint's Jeff Mezger, VP of Product Management, explores why market data management is becoming a more important part of trading performance.

EuroCTP: What Firms Should Consider

As an official redistributor of the EuroCTP feed, we provide connectivity to both firms that contribute data to the tape and those that consume it, which provides Waypoint visibility across both sides of the market. In this [blog](#), Yousaf Hafeez, Head of Business Development for Waypoint's Radianz portfolio, examines what EuroCTP

means for firms and what key factors they should consider.

Waypoint Trading Solutions Announces Connectivity with Texas Stock Exchange

In a press release issued ahead of the launch of the Texas Stock Exchange (TXSE), Waypoint announced that it would be enabling connectivity to the new venue from day one. Headquartered in Dallas, Texas, TXSE is a fully integrated, electronic national securities exchange. With TXSE now live, this connectivity means that Waypoint clients can access the majority of the world's exchanges and alternative trading systems, including all 22 US equities exchanges, alternative trading systems and overnight venues.

Navigating the New Geography of Trading

The New Architecture of Market Access

Tom Lazenga, President of Waypoint Trading Solutions, explores how the geography of trading is evolving as strategies, data and compute shift across regions. [Read the full article](#), first published in TabbFORUM, to discover how firms are adapting to this new reality.

Financial markets are becoming harder to map as firms operate across more venues, counterparties, providers and sources of market activity. In his latest [article](#) for TabbFORUM, Waypoint's Yousaf Hafeez, examines why market access has become a question of ecosystem architecture.

Waypoint Trading Solutions to Expand European Exchange Connectivity with Equinix MD6 Deployment in Madrid

In preparation for BME (Bolsas y Mercados Españoles) migrating its matching engines from BME's Las Rozas data center to the Equinix MD6 colocation data center in Madrid, Waypoint expanded its European exchange footprint with the launch of services in MD6. This expansion provides customers with continued ultra-low latency Layer 1 exchange connectivity to all key European financial hubs, complementing Waypoint's existing colocation services in London, Frankfurt and other major exchanges.
